

Project-StarFall Code Quality Assurance Record

Cover Sheet

The questioner completes one cover sheet for each pull request and attaches one or more copies of `qa_sup.pdf` to record the questions and evaluations.

1. The questioner must print the form and complete it by hand in ink.
2. Conduct the QA live using Zoom or another real-time meeting platform. The PR author must answer each question live and without AI assistance, and must not access or complete this record.
3. The questioner must be the next technical authority: Component Maintainer for a Contributor, Family Maintainer for a Component Maintainer, Project Maintainer for a Family Maintainer, or a different qualified Family Maintainer for the Project Maintainer.
4. The questioner must keep the original for four months after merge, unless it is sent earlier at the Project Maintainer's request. During the first three months after merge, the Project Maintainer may request delivery. The request must provide the address and required delivery service, and the Hotaru maintenance team will cover the delivery fee. Without such a request, no delivery is required. Failure to retain or produce a requested original may cause the declaration to be treated as unverified or potentially false and referred for governance review.
5. Write in English, Japanese, Traditional Chinese, or Simplified Chinese.

I. Pull request details

Repository: _____ **PR number:** _____

PR author: _____ **Date:** _____

Family: _____ **Component:** _____

Questioner: _____ **Pages attached:** _____

II. Review conditions

Mark every statement that applies.

- ☐ The questioner is the responsible Component, Family, or Project Maintainer.
- ☐ The questioner did not author the code being reviewed.
- ☐ The change introduces or alters a public module, type, trait, function, or other stable API.
- ☐ The PR author's completed Update Report has been received.

PR's declared AI tier: ☐ Forbidden ☐ Author-Owned ☐ Human-Led ☐ Co-Authored

III. Declarations

Questioner declaration. I conducted this QA live with the PR author using a real-time meeting platform. I reviewed and understand the code covered by this record and accept responsibility for the accuracy of my evaluation. I accurately recorded the questions, my evaluations, and any supplementary clarification. The PR author answered every recorded question live and without AI assistance, and did not access or complete this document. I completed this record, including every attached page, by hand in ink and without AI assistance.

Questioner signature: _____ **Date:** _____
